Organised by Ministry of Commerce, GoI and CII
Mumbai, May 17, 2018**

**Dr. Paritosh Basu, Senior Professor
Chairperson MBA (Law) Programme
NMIMS School of Business Management**

Traditional Belief – Differential Thinking Points

- Tradition – “Legal Education is a method, arena and platform for rational, orderly and non-violent settlement of disputes and handling of conflicts”
- *Law is not for Litigations only, Litigations are only not for Law being there*
 - *Socialisation of Law with mass awareness is the call of the day*
 - *Let Law be the **Enabler of Peace in Society** and not a tool to create fear psychosis*
 - *Let Law be the harbinger of Risk Enabled Business Management*
 - *Changing dimensions of VUCA in Business Ecosystem – Let’s make Laws flexible and dynamic enough to deal with emerging realities*
 - *Industry 4.0 – Academic system, execution machinery and Judiciary should be enabled to function in a digitally transformed society as legal profession will heavily be disrupted*

Common Man, Law, and Judiciary

- Success of Law and Judiciary does not (only) depend on the created fear and quality of justice – *Essential factor is the respect they command*
- Greed, anger, knowledge gap of consequences are drivers of violations – *A Law is as good as its socialisation impact and effective execution*
- Law is a product of society and functions within it – *Common people generally follow moral value system, cold and blind logic of Law is many a times difficult to apply, may lead to an irregular and unjust result*
- Enacted and Common Laws – *Prudent and providential mix of applications keeping pace with fast changing dynamics of time*
- Only learning Law doesn't make a Lawyer – In-depth knowledge of *Legal History, Sociology, Psychology, Pol. Science, Economics and Finance, etc. is essential*
- Corporates look for Multitasking Capabilities – *MBA (Law) is the answer*

Certain Viewpoints

- **Relevance of Legal Education – Course Structure and Contents befitting contemporary social and global business ecosystem**
- **Legal Education Management – Research and Application oriented teaching by professional lawyers from corporate houses and judicial system**
- **Digital Transformation with IT Jurisprudence – New skills to use Digital Tools for Forensic Analytics, management of evidences and audit trails**
- **Extensive Research – Life line for rejuvenating and contemporising Law**
- **Soft Skills – Personal grooming and proficiency in forms of communication**
- **Contract Management – Risk-enabled Smart Contract management in digital platforms like Blockchain in Industry 4.0 era**
- **Writing, Negotiation, and Dispute Resolution – Let emphasis be more on Alternate Dispute Resolution (ADR) system to reduce burden on Judiciary**

A Few Lines for the New Generation of Lawyers

तालीम नही दी जाती परिंदों को उड़ानों की
वो खुद ही सीख जाते है ऊँचाई आसमानों की
सीढ़ीया उनके लिए है जिनको चाहत है उड जाने की
जिन की निगाह आसमानोंसिं वो अपनी मंज़िल खुद ही ढूढ़ लेते है
